

Phylogenetic relationships and classification of the major lineages of Apoidea (Hymenoptera): with emphasis on the crabronid wasps

by Gabriel A. R Melo

Phylogenetic relationships and classification of the major lineages of Apoidea (Hymenoptera): with emphasis on the crabronid wasps - Primary Source Edition .
?Morphology, Classification, and Antiquity of Melittosphex . - BioOne Matthews RW (1991) Evolution of social behavior in the sphecid wasp. 913 pp Melo GAR (1999) Phylogenetic relationships and classification of the major lineages of Apoidea (Hymenoptera), with emphasis on the crabronid wasps. RB (2005) Higher-level bee classifications (Hymenoptera, Apoidea, Apidae sensu lato). Phylogenetic Relationships and Classification of the Major Lineages . 18 May 2018 . Apoid wasps and bees (Apoidea) are an ecologically and morphologically diverse group of Hymenoptera, with some The phylogenetic placement of the species-poor crabronid wasp Possible phylogenetic relationships of the major apoid wasp lineages and of bees 2013;280(1755):20122686. Phylogenetic relationships and classification of the major lineages of Apoidea (Hymenoptera), with emphasis on the crabronid wasps. Full-Text Paper (PDF): Phylogenetic relationships and classification of the major lineages of Apoidea (Hymenoptera), with emphasis on the crabronid wasps. Encyclopedia of Entomology - Google Books Result Buy Phylogenetic relationships and classification of the major lineages of Apoidea . lineages of Apoidea (Hymenoptera): with emphasis on the crabronid wasps Phylogenetic relationships and classification of the major lineages of Apoidea (Hymenoptera): with emphasis on the crabronid wasps. Home ; Details for: Phylogenetic relationships and classification of the major lineages of Apoidea (Hymenoptera) with emphasis on the crabronid wasps. Normal view Contributor(s): UNIVERSITY OF ARKANSAS [AUTOR INSTITUCIONAL]. Phylogenetic relationships and classification of the major lineages of Apoidea (Hymenoptera), with emphasis on the crabronid wasps. The Crato Fossil Beds of Brazil: Window into an Ancient World - Google Books Result 10 Dec 1999 . Phylogenetic Relationships and Classification of the Major Lineages of Apoidea (Hymenoptera), with Emphasis on the Crabronid Wasps. Phylogenetic relationships and classification of the major lineages of Apoidea (Hymenoptera) : with emphasis on the crabronid wasps / by Gabriel A. R. Melo. morphology, classification, and antiquity of Apoidea (Hymenoptera) with emphasis on the crabronid wasps. Scientific Papers Contributions of the American Entomological Institute 22(1): iii + 73 pp. Perkins, R. C. L. Morphology, classification, and antiquity of Melittosphex burmensis . 14 Jun 2012 . The hymenopteran superfamily Apoidea includes the bees Bayes Factor tests strongly rejected the hypotheses of crabronid monophyly Bees (Anthophila) are currently one of the most important lineages of insect pollinators on earth. Apoidea, or relationships between the major apoid wasp lineages. The Sand Wasps: natural history and behavior - Google Books Result Phylogenetic relationships and classification of the major lineages of Apoidea (Hymenoptera) : with emphasis on the crabronid wasps. by Melo, Gabriel A. R. Evolution of the Insects - Google Books Result Phylogenetic Relationships and Classification of the Major Lineages of Apoidea (Hymenoptera) [electronic resource]: With Emphasis on the Crabronid Wasps . Identifying the sister group to the bees: a molecular phylogeny of Apoidea (Hymenoptera) and classification of the major lineages of Apoidea (Hymenoptera), with emphasis on the crabronid wasps. and A. N. Luppova, eds., Nasekomyiye nizoviy Murgaba (vostochnaya Turkmeniya): Fauna, ekologiya, Phylogenetic Relationships and Classification of the Major Lineages . Revista Brasileira de Zoologia 22 (1): 153–159, março 2005 . The current classification of the aculeate Hymenoptera apoid wasps), in the superfamily Apoidea (BROTHERS 1999, MELO . provided mainly by the phylogenetic analyses presented in major groups in bee taxonomy, i.e. the families of MICHENER s. Ecology of Social Evolution - Google Books Result 21 Dec 2007 . Souq Phylogenetic Relationships and Classification of the Major . Phylogenetic Relationships and Classification of the Major Lineages of Apoidea (Hymenoptera): With Emphasis on the Crabronid Wasps [Gabriel A. R Melo] on Zootaxa, Phylogeny and Classification of Hymenoptera. 12 déc. 2014 A new genus and species of pemphredonine wasp in Late. Cretaceous . crabronid subfamily Pemphredoninae by the combination of its small . Insecta Mundi 13(3–4):97–110. Bohart Phylogenetic relationships and classification of the major lineages of Apoidea (Hymenoptera), with emphasis on the Apidae: Apini - Oxford Journals A new species of wasp (Symphyta, Sepulcidae) from the Santana Formation (Lower Cretaceous, Northeast Brazil). Journal of the Entomological Research Society 9(1): 1–6. Martynov Phylogenetic relationships and classification of the major lineages of Apoidea (Hymenoptera), with emphasis on the crabronid wasps. morphology, classification, and antiquity of melittosphex . - Jstor Diphaglossinae, are confronted with phylogenetic evidence. wasps (Apoidea: Ampulicidae, Crabronidae, Heterogynaidae and the relationships among its major lineages among the main lineages of Colletidae and bee classification, these enigmatic bees have (Hymenoptera), with emphasis on the crabronid.
